

DEFENSE LOGISTICS AGENCY

AMERICA'S COMBAT LOGISTICS SUPPORT AGENCY

The seal of the Defense Logistics Agency is centered in the background. It features a bald eagle with wings spread, perched atop a shield with vertical red and white stripes. Above the eagle is a banner with the word "LOGISTICS". The entire emblem is set against a circular background with a globe-like pattern and stars.

Government Furnished Property Proposed Interim Solution

Beth Altman
November 8, 2012

DLA GFP Interim Solution

- DoD proposed interim WAWF/DSS solution for GFP
 - Use data mapping to report property transfers
 - Use the WAWF/DSS functional interface - WAWF ASN (EDI 856) format and depot receipt (EDI 527R) transaction
- Mapping transactional data will provide means to document custody transfer, e.g., GFP movement from repair facility to DLA distribution depot
- GFP Interim Solution Working Group:
 - DPAP, DLMSO, DLA, CACI, GEX (Northrop Grumman) DLATS
- Successfully initiated test transactions and data mapping to prove the concept
- Interface coordination underway
- Proposed DLMS Change, PDC1042, GFP Reparables

Interim solution advances the DoD policy compliance and the Financial Improvement Audit Readiness (FIAR) requirement to improve DoD property accountability

Why Develop Interim Solution?

- DoD has been criticized for not knowing what it owns, what it's worth and where the property is located
 - Interim solution provides intransit visibility, supports material accountability
 - Who has custody of GFP
 - Documents vendor shipment and receipt of reparable when shipped to a DSS depot
 - Using WAWF/DSS interface and DLMS transactions allows:
 - Vendor to utilize RFID and IUID functionality via WAWF
 - Systemic updates to the DoD IUID/GFP registry
- Interim solution moves DLA closer to becoming compliant with DFARS GFP clauses 252.211-7007 and DFARS 245.103-70

GFP Business Process

- Proposed GFP solution requires:
 - WAWF Advance Shipment Notice (ASN DLMS 856)
 - Receipt (DLMS 527R) transactions
 - GEX correlation database
- Test transactions processed successfully
 - WAWF sent DSS a DLMS 856 using 'TS' in the beginning segment
 - DSS generated the 527R receipt to ICP via DLATS
 - DLATS sent WAWF a copy of the DSS 527R receipt when document identifier code of 'D4M' was present in LQ segment
- GEX to create a correlation database to filter WAWF 'TS' ASN's and format DSS 527R receipt 'D4M' data to update the WAWF record and the DoD IUID and GFP Registries
 - Moving forward to implement interim solution prototype

prototype will
occur to determine if solution can be expanded across all

Next Steps

- Interface coordination underway
 - DSS systems change
 - GEX building correlation database
 - DLATS data request submitted
 - DLMS PDC 1042, 'GFP Reparables'
- Key to success
 - Vendors must submit their DLMS 856 ASN to WAWF NLT one business day of reparable shipment

Recommend Military Services consider GFP
interim solution
